Subject: Sequence Search Request 09/697186

For: Kathleen Kerr
Employee #77468
Mail Box 10C01
Art Unit 1652
Rm 10B13, CM1
305-1229

In Application No. 09/697,186 in *commercial* and *interference* databases:

Please search SEQ ID Nos: 1 and 2 against amino acid databases.

Please call with any questions.

Please save results from commercial and interference databases on ****different diskettes****

Thank you very much.

Kathleen Kerr

Pending Nucleic Acid and/or Pending Amino Acid database searches now generate two sets of results. These databases were split into two parts to reduce the time needed to update the databases daily. The split freed up more machine time for processing searches.

Searches run against the Nucleic Acid Pending database produce two sets of results, with the extensions, **.rnpm** and **.rnpn**

Searches run against the Amino Acid Pending database produce two sets of results, with the extensions, **.rapm** and **.rapn**

The Pending database search results should not be left in the case because they contain data that is confidential.
